Silicone Oil Moon-207B

INCI Name: Cyclopentasiloxane (and) Dimethiconol

Introduction:

Moon-207B Fluid is a blend of approximately 15%-20% of an ultra high viscosity dimethiconol in cyclopentasiloxane. The skin feel of Moon-207B Fluid has been demonstrated to be equivalent to that of Moon-208A.

Advantage:

Emulsion products:

Moon-207B Fluid can be incorporated directly into the oil phase of the formulation. If temperatures above 70°C are being used to melt the oil phase, Moon-207B Fluid should be added slowly after the formation of the emulsion, and below 60°C, using a high shear mixer.

Non-emulsion products:

It is advisable to add cosmetic ingredients to the silicone and not vice versa as often ultra high molecular weight dimethiconol is incompatible with other cosmetic ingredients.

Specifications:

项目 Items	指标 Specification
Appearance	Clear viscous fluid
Viscosity (25℃), cst	5000-8000
Non- volatile content, %	13-15
Refractive index (25℃)	1.3900-1.4000
Specific gravity (25℃)	0.950-0.975
Cyclotetrasiloxane (D4) content	<0.94

Applications:

Areas of potential use for Moon-207B Fluid encompass a wide range of Cosmetic and Toiletry applications such as:

- Skin Care - Color Cosmetics - Sun Care - Hair Care - Shower Gels - Antiperspirants and Deodorants.

Storage:

When stored at or below 25°C in the original unopened containers, this product has a usable life of 24 months from the date of production.

Packing:

190kg drum, 950 IBCs or as request.
